

Funstuff

How to use funstuff

You can personalize your appearance in the game, using these cvars in your cfg, or in console :

Funblue *item* - To customize blue team character

Funred *item* - To customize red team character

Funfree *item* - To customize the character in team free game modes (FFA, LMS, Jump) This uses only the red funstuff.

There are new cvars for turning funstuff on and off for both the client and the server.

g_allowFunstuff *0/1* turns funstuff off and on for the server

cg_showFunstuff *0/1* turns funstuff off and on for the client

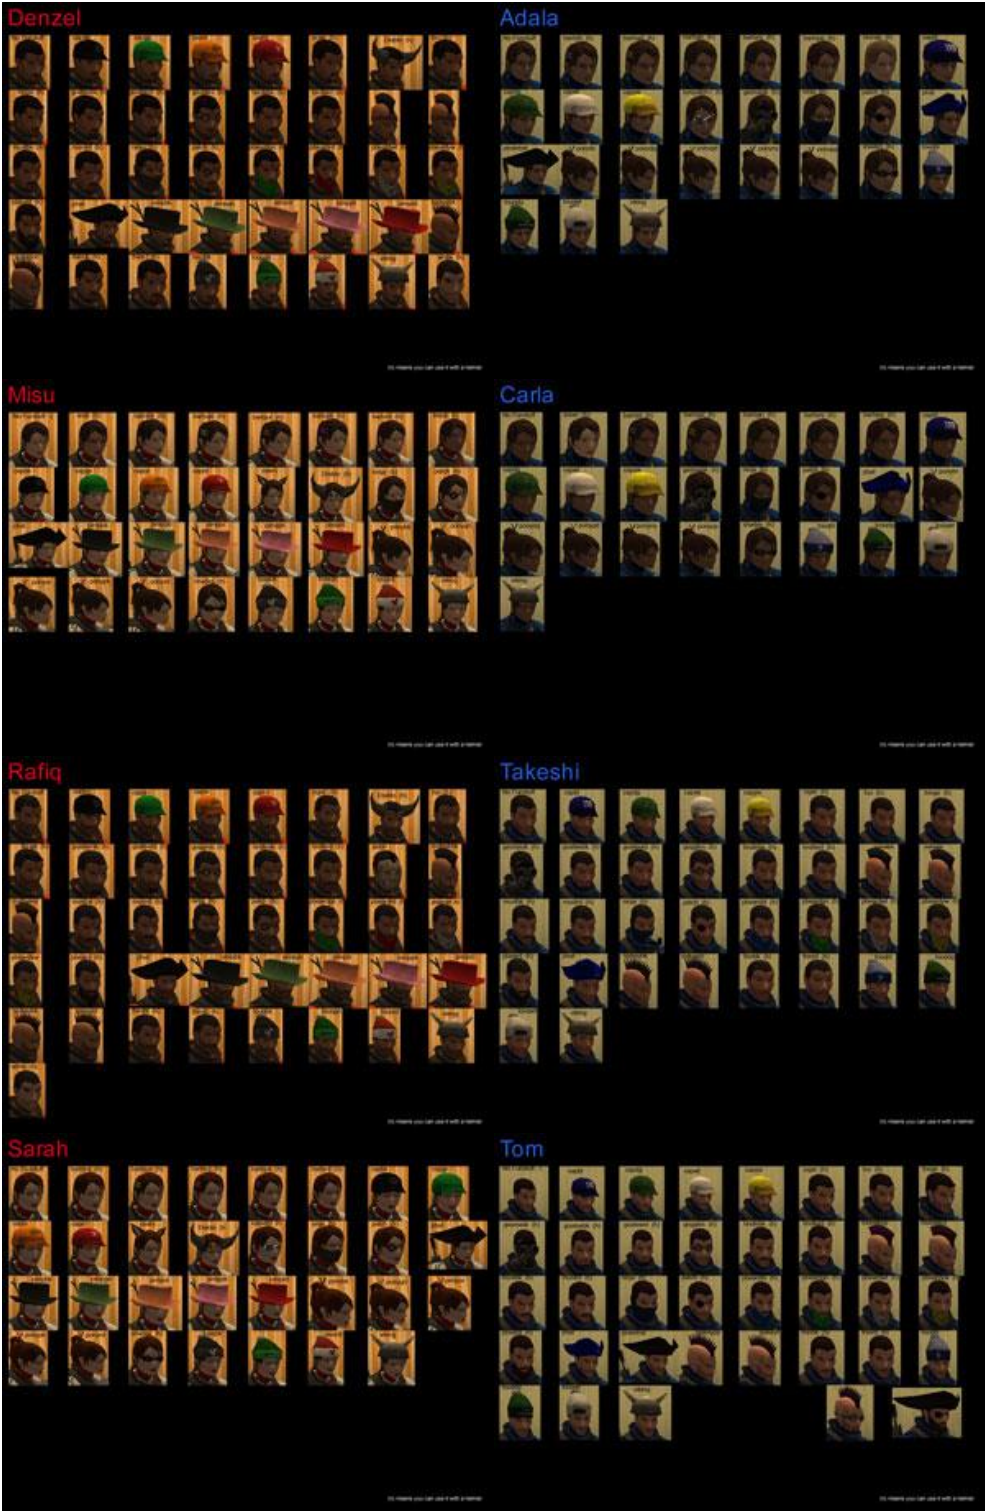

For example, for Tom on the blue team `/funblue ninja,goggles,spikeypp` will change his appearance; he will have punk hairs, a ninja mask and goggles.

You can test your appearance using the mirror of the map Dressing Room.
